Initiative **PRO**
Massivholz

The family business founded in 1922 in Westenholtz in East Westphalia and now in its third generation manufactures high-quality solid wooden furniture for your home.

Our lasting and passionate furniture tradition is our obligation. That is why only robust, high-grade materials are employed, which we process in true craftsmanlike fashion with the aid of the modern industrial technology at our disposal.

Besides modern technology, our craftsmen also play a key role. Our fully trained and highly motivated personnel make an essential contribution to the manufacture of our furniture.

As a solid wood specialist and a member of the "Initiative for Solid Wood" we manufacture every unit of furniture individually. The result is an unmistakable single product that is unique in its quality and design.

The award of the "Golden M" label by the German Furniture Quality Association again underlines our own statement of quality.

For only furniture that is safe, durable and free of any harmful substances is granted the RAL seal (see www.dgm-moebel.de). This quality feature is confirmed by ongoing tests carried out by neutral institutes.

Another main focus of the company is the unproblematic production of special-sized units. These made-to-measure products specially commissioned by the customer are part of our daily business. For almost anything is possible with solid wood.

It is our aim to fulfil your very own furnishing dreams.

DGM EMISSIONS LABEL

The collections/models marked with the Emissions Label fulfil the requirements of the Emissions Label of the German Furniture Quality Association in the corresponding category.

OUR COMMITMENT - ENTIRELY NATURAL !

Quality, trust and safety are close to our heart from the outset.

Wood is a renewable raw material

Ecological arguments also speak for solid wooden furniture. Wood is a renewable raw material from sustainable forestry regions and 100% recyclable. We ensure that our solid wooden furniture is manufactured using environmentally friendly processes where harmful substances are kept to an absolute minimum. Contrary to other materials, solid wood has a very long lifespan, for wood is a very high-quality material that can age with dignity whilst requiring little in the way of care. That in itself is sustainability!

Unique feel and long-term value

Furniture made from solid wood is popular for a number of reasons. With its natural aroma, its quite unmistakable and individual grain, its authentic colouring and unique feel, it sets itself clearly apart from furniture made from other materials. Solid wooden furniture is also particularly lasting in value and, thanks to its timelessness and beauty that even increases with its patina, it is often handed down from generation to generation.

Endearing companions and friends for life

Yet another frequent argument offered for purchasing solid wooden furniture is the healthy climate in the room and the resulting feeling of well-being on the part of all its occupants created by the porous, living material of wood. Such furniture regulates the humidity in the room, radiates warmth and comfort, imbues every room with life and quality and is an endearing companion and friend for as long as you live.

Surface

The substances used in the surface treatment of our units are specially selected depending on the type of wood and its natural characteristics. Each individual substance conforms to DIN-EN 71-3 "Safety of Children's Toys" and DIN 53160 "Resistance to Saliva and Perspiration". Only high-quality and environmentally-friendly hydro or PUR lacquer systems are used on our furniture surfaces.

Brackets
